

1     **ABSTRACT OF THE DISCLOSURE**

2           A remote control method for controlling electrical appliance via a home gateway  
3 proceeds with an input signal by a telephone call to initialize the main board (the host) to  
4 connect to the INTERNET. After registering to the specific DNS server to have a  
5 pre-registered IP address, the user is able to control the operation of household electrical  
6 appliances.
